EDUCATION

University of Windsor
Bachelor of Computer Science (Honours), Applied Computing
Expected Graduation: 2026 (MGPA: 3.7)

EXPERIENCE

TransForm Shared Service Organization
Jr. Support Analyst
June 2024 - August 2024

- Assisted in incident response during a CrowdStrike kernel/OS outage, helping to restore critical systems under tight deadlines.
- Upgraded 50+ workstations to Windows 11, configuring enterprise applications (Teams, shared drives) to ensure compatibility with new OS versions.

Floral Treats (Freelance Developer)
Fall 2025 – Present

- Designing and developing an ordering platform for a small business, including product catalog, cart, and order management system.

University of Windsor
AI Club President
Sept 2025 – Present

- Leading a 10-member executive team to organize AI workshops, Kaggle competitions, and hackathons.
- Building collaborations with faculty and industry to expand membership and project opportunities.

PROJECTS

MERN Stack Store
Built and deployed a full-stack MERN store (React/Vite + Chakra UI, Express + MongoDB Atlas) with product CRUD and routing.

Hospital Management Database Project (C++, SQL)
Collaborated on a database-driven system for patient records, appointments, and billing.

React Website (JavaScript, React, HTML/CSS)
Built a personal portfolio showcasing interactive components and responsive design.

Hackathons & Workshops:

NASA SpaceHacks (2025) – 3rd Place Winner

- Built the "Exoplanet Transit Classifier," a machine learning model using Kepler/TESS light curves to detect exoplanet-like signals with interpretability.
- Developed with React + FastAPI + Random Forest; collaborated with a multidisciplinary team of students.

Jaguar Land Rover Hackathon (Fall 2025, 4-month project):

- Developing an AI/ML solution to an industry challenge.

Sterling Cybersecurity Workshop (Fall 2025, Ongoing):

- Exploring system vulnerabilities and penetration testing through hands-on labs.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, C#, Bash, Assembly
Web Development: React, HTML, CSS, Node.js, Vite
Databases: SQL, MongoDB
Tools: Git, Linux, Azure, Wireshark, Kali Linux
AI/ML: Scikit-learn, NumPy, Pandas, Matplotlib, Jupyter Notebook

LANGUAGES

Hindi, English, Urdu
